Request form for Genome Diagnostics

The VU University Medical Center (VUmc) in collaboration with the Academic Medical Center (AMC) provides molecular testing through their joint Amsterdam Genome Dx website: www.amsterdamgenomedx.com

We offer next-generation sequencing panels along with conventional single gene sequencing, deletion/duplication testing, methylation analyses and array-CGH for copy number analysis. In addition to this we provide prenatal diagnostic testing services. As a non-profit organization we can offer competitive rates and for residents of EEA countries, we accept S2 forms.

For more information and/or to order a test, please use the link:
